KUMA BATHROOM CONCEPTS

Versatile solutions that add value to any investment through design, functionality and durability.

- Durable products with an average lifetime of 20 years
- Custom concepts with dimensions, colours and shapes of your choice
- Basin and countertop cast in continuous surface - a design solution with high resistance
- Simultaneous use of washbasin due to the various possibilities of configuration: multiple basins or long basin - trough type
- Design freedom - we can develop new basin designs according to project requirements
- Multiple integrated functions: cut-out for waste bin, soap dispenser, tissue dispenser, LED lighting system.
- Possibility of refinishing the product after years of use to look like new
- Easy installation and maintenance

CUSTOMISED SOLUTIONS

Over 90 basin shapes

7 types of material, over 50 colours

High quality products

Customised dimensions upon requirement

Natural, hard materials

Easy maintenance

There is almost no limit to the variety of designs that KUMA can offer, thanks to flexible washbasin sizes, an extensive range of colours, models and customizable configurations.

From standard, economic washbasins to  **special** products offering a wide array of shapes and sizes, to fully **custom-made** solutions, KUMA can meet any request. 

KUMA STRONG POINTS

With modern manufacturing facilities in both Romania and Denmark, we combine minimalist Nordic design, innovative technology and high production standards to create sustainable products.

- Durability
- Versatility
- Sustainability
- Modern custom-made technology
- Ease of maintenance

CARBON FOOTPRINT

KUMA is able to document carbon footprint per kilogram of product, enabling precise and transparent tracking for sustainability accounting purposes.

Footprint CO ₂ e according to Emission Calculation Report 2022	0.29 Kg CO ₂ e/Kg cast product
01.01.22 – 31.12.22	8.46 Kg CO ₂ e/cast item
Footprint CO ₂ e according to Emission Calculation Report 2023	0.26 Kg CO ₂ e/Kg cast product
01.01.23 – 31.12.23	5.89 Kg CO ₂ e/cast item

RESPONSIBLE MATERIALS SOURCING

KUMA's **BES 6001 certification** guarantees responsible raw material sourcing, proving our concepts are produced ethically and sustainably from procurement to delivery.

HIGH QUALITY CERTIFIED PRODUCTS

KUMA is certified by INTERTEK Group Plc UK for responsible sourcing (**BES 6001**), quality (**ISO 9001**), OHS (**ISO 45001**) and environmental responsibility (**ISO 14001**).

LOW-CARBON LOGISTICS

KUMA's lighter washbasins, combined with reduced packaging and optimized stacking, reduce carbon emissions through distribution chain.

SUSTAINABLE - ORIENTED DESIGN

Our concepts deliver high-quality design and functionality while emphasizing our sustainability commitment through reduced material consumption. E.g: SM concepts

ECO FRIENDLY, NATURAL MATERIALS

KUMA washbasins contain up to 80% natural materials, locally sourced. We use recycled raw materials into the production process. E.g: Eco-Labelled resins.

LONG LIFESPAN PRODUCTS

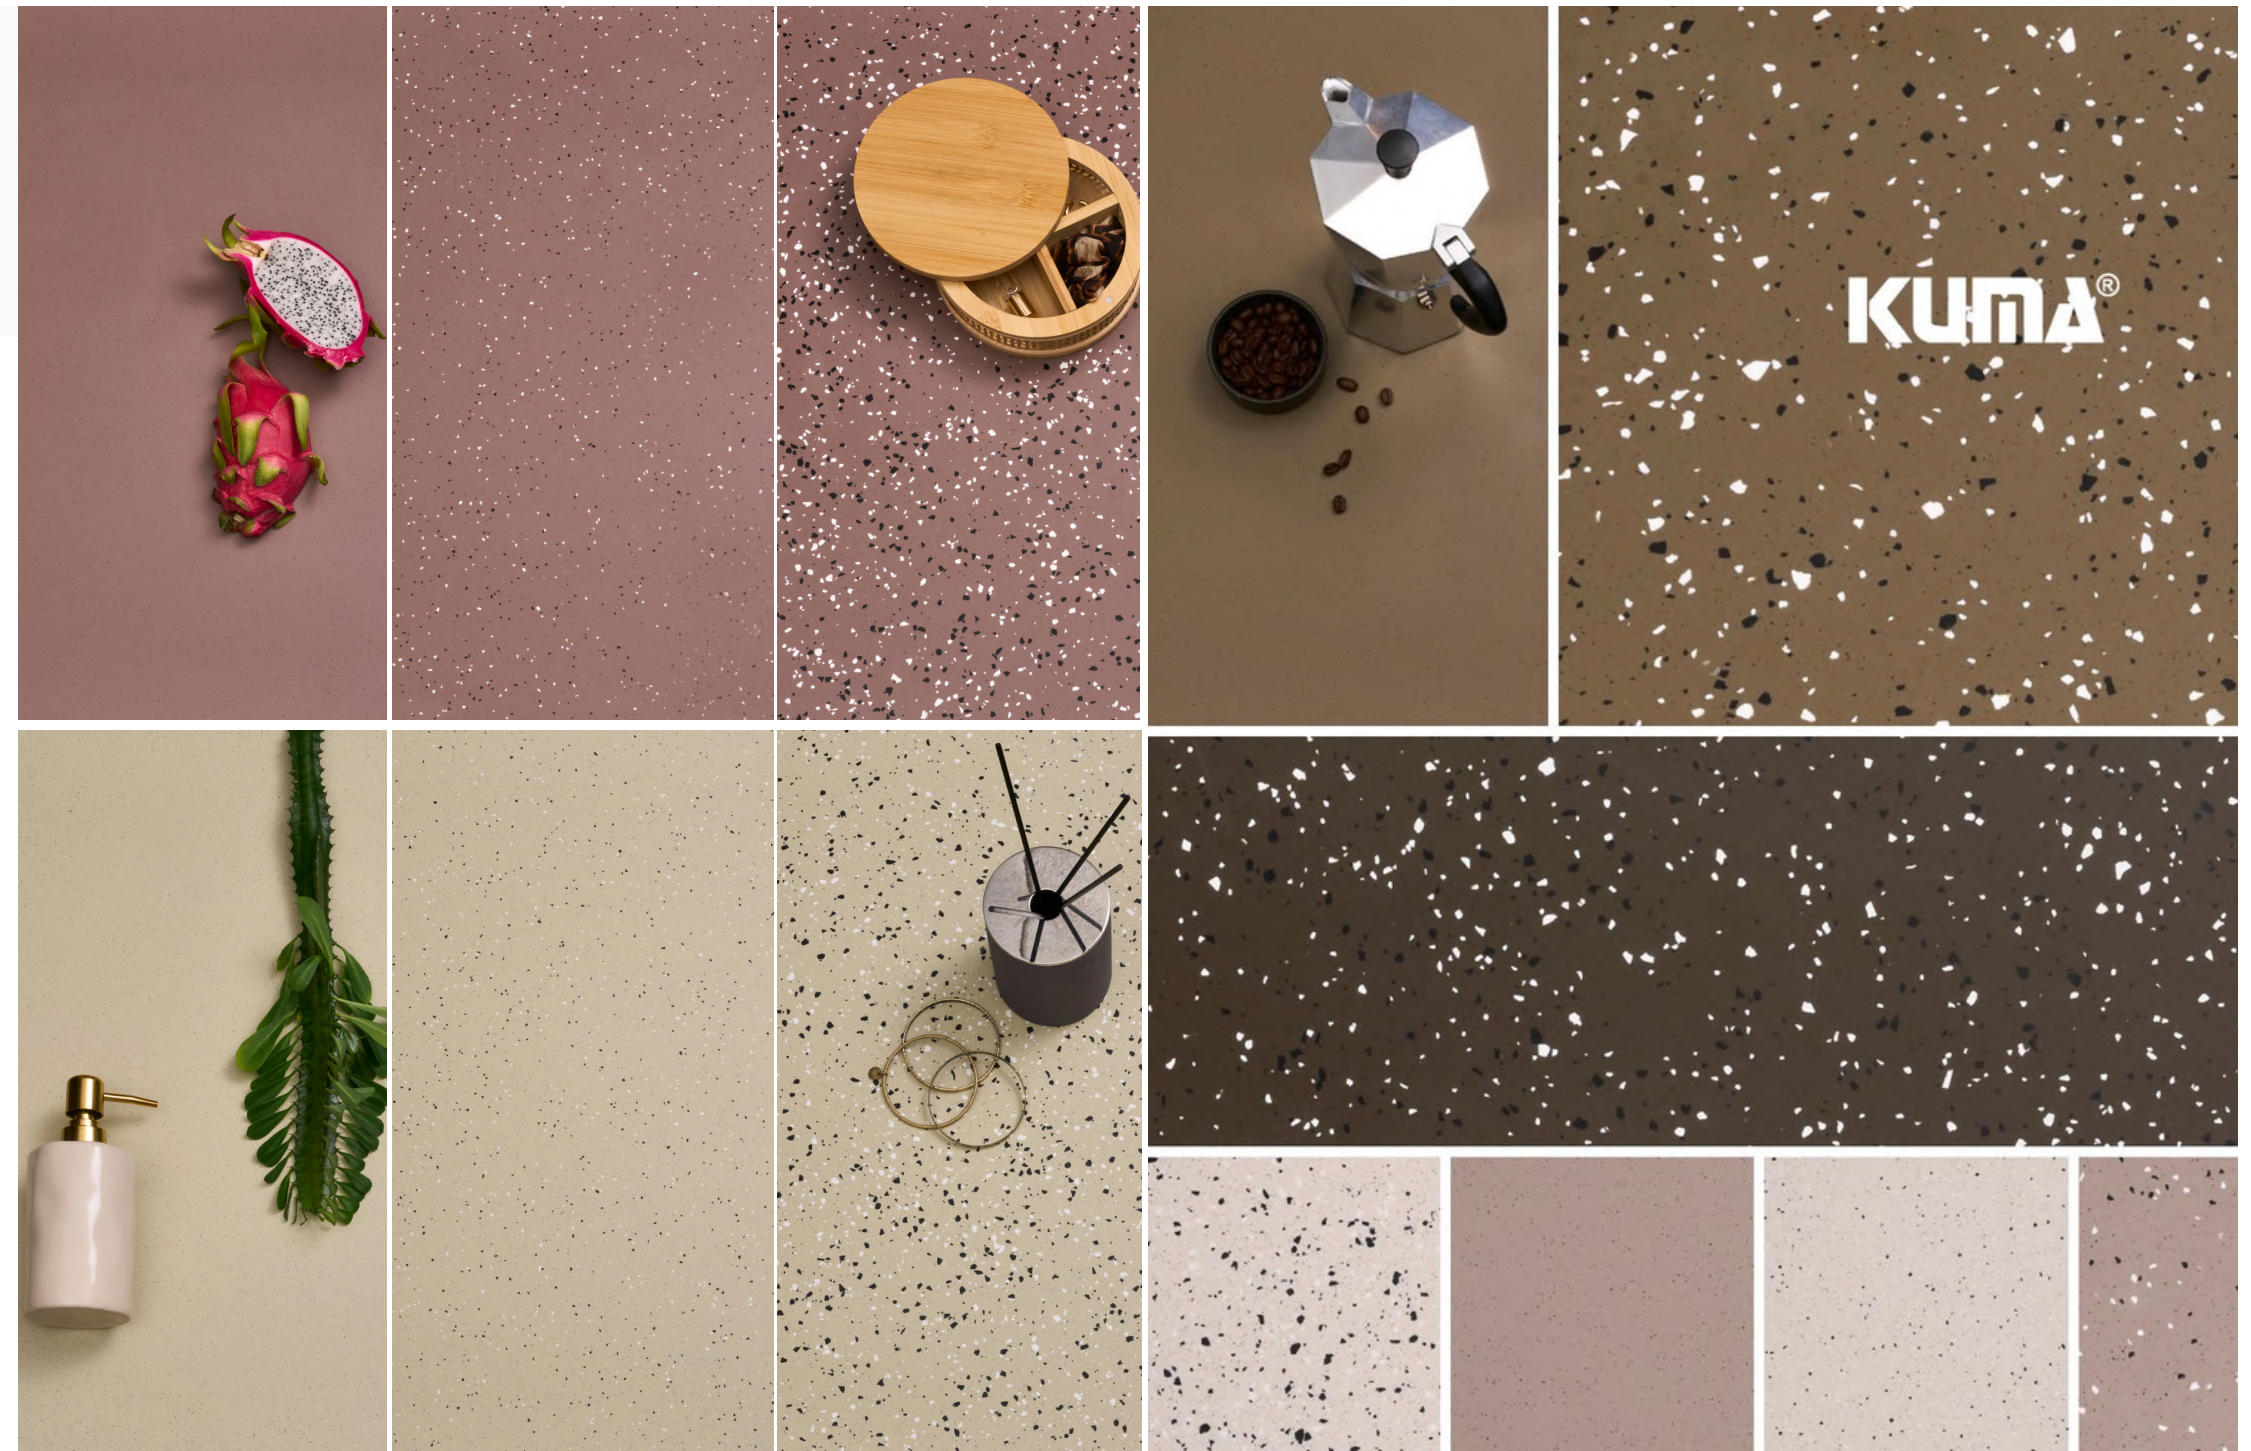

KUMA's surfaces are repairable and repolishable, reducing waste, promoting environmental responsibility and ensuring durability for up to 20 years.

KUMA MATERIALS

With 7 distinct material groups and over 50 color choices, KUMA offers a wide range of customization options that meet the specific requirements of every project.

We create concepts that not only stand the test of time but also align with contemporary trends, reflecting our commitment to sustainable design and modern aesthetics.

All Kuma materials are composite materials, and are obtained by casting into molds. The recipes used incorporate Kuma know-how. Our products are tested and accredited according to international standard CE EN 14688-A1:2018

NEW COLORS FOR 2025

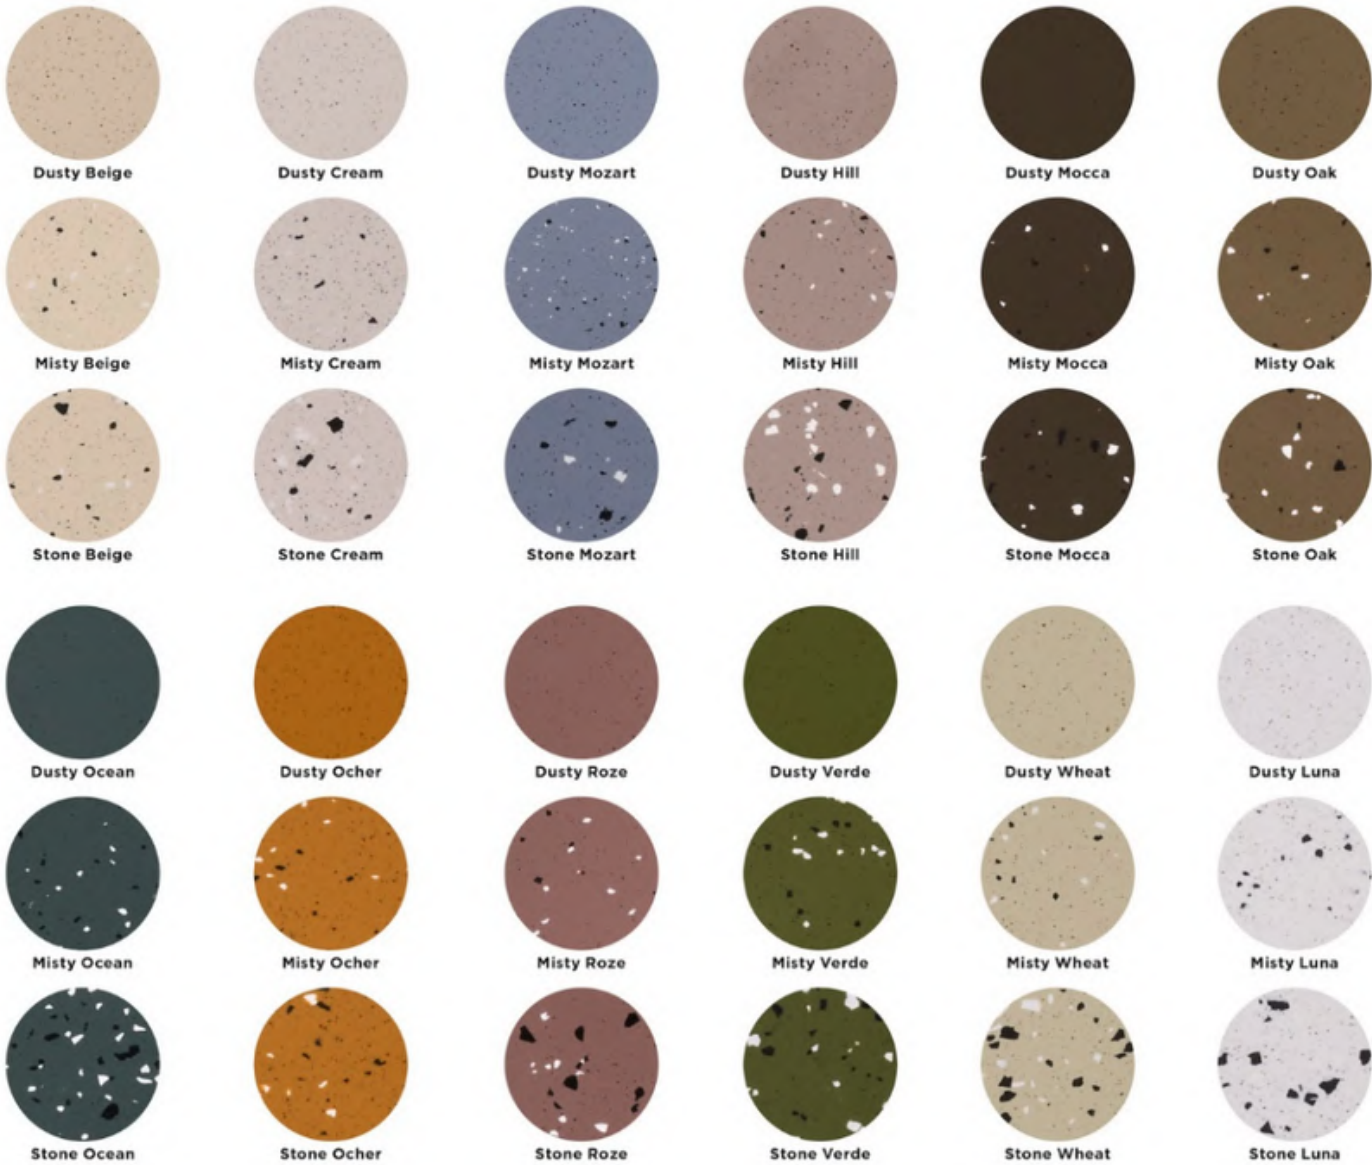

KUMA introduces **12 new Rector® colors**, developed with a vision to meet the design needs of the future. These new colors bring a modern update and blend seamlessly with Pantone’s 2025 color palette.

Rector® combines aesthetics and texture by incorporating stones in various sizes – from the finest grains to larger, bold fragments.

Dusty, Misty & Stone deliver timeless and adaptable design options, enhancing the ambiance of any space.

SUSTAINABLE LOW CO2 FOOTPRINT SOLUTIONS

SM washbasins range

SM washbasins range feature an optimized super-thin design, reducing thickness to lower consumption and carbon footprint. This minimal environmental impact highlights KUMA's commitment to sustainability through careful material reduction.

The clean, minimalist lines blend refined design with practicality, creating a harmonious look that reflects both simplicity and elegance.

SOLUTIONS FOR COMPACT BATHROOMS

HORECA washbasins range

Inspired by Nordic style, KUMA concepts combine high quality with ergonomic design.

By embracing minimalism, KUMA washbasins enhance the sense of space in small bathrooms, while the countertop surface is designed for optimal comfort. The concept can be customised with LED system, cut-out for towel or additional shelf.

SOLUTIONS FOR COMPACT BATHROOMS

LUCKY washbasin model

LUCKY washbasin is a sustainable and stylish solution specifically tailored for compact bathrooms.

The new model is designed as a monolith, in composite material - based on 80% natural stone combined with resins, providing durability and a distinctive look.

Thanks to the made to measure dimensions, it provides space on the countertop for care products.

SOLUTIONS FOR COMPACT BATHROOMS

ZOOM Loft slim

When it comes to minimalist bathroom design, Zoom concepts are smart and modern solutions.

With our wide range of customization options for washbasins, countertops and shelves, you can combine colors and shapes to meet the particular needs of every project.
