

KUNA[®]

HOTEL CONCEPTS

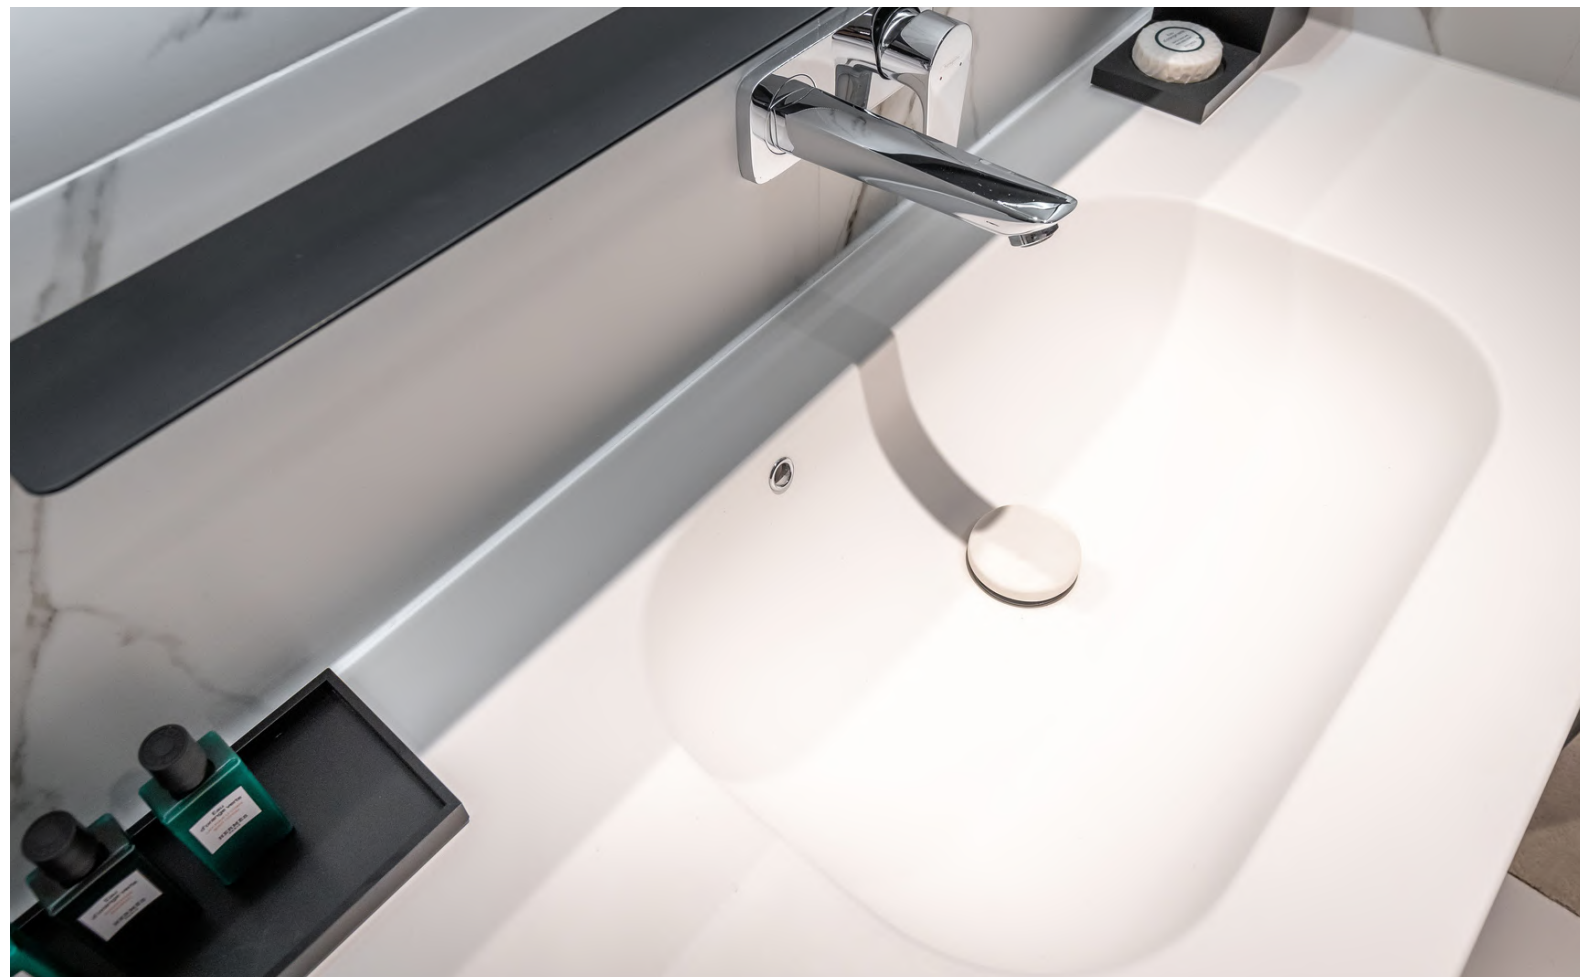

UNIQUE, SUSTAINABLE AND DURABLE SOLUTIONS

based on technology combined with craftsmanship, innovation and natural materials, recomposed

The KUMA concept means a product with fluid & continuous lines, easy to install & maintain and with an unique, exclusive design. KUMA washbasins are cast in continuous surface between the basin and the countertop, without unaesthetic cutouts or gluing, which means superior strength. With a wide variety of basin models, made-to-measure washbasin dimensions and diverse options of materials & colours, KUMA is one of the leading suppliers of bathroom concepts dedicated to hospitality projects.

KUMA product strengths:

- Product certified with Declaration of Performance (DOP) - CE mark according to international standard EN14688-A1:2018;
- Product with integrated certifications, issued by INTERTEK GROUP Plc:
 - Quality Certificate acc. ISO9001-2015 - UKAS quality mark
 - Environmental accredited certificate acc. ISO14001-2015
 - Accredited Occupational Health and Safety certificate acc. ISO45001-2018
- EPD – Environmental Product Declaration for KUMA products
- 5-years warranty period and permanent technical support;
- KUMA provides all the required logistic, support and future service
- High production capacity. Possibility of deliveries in stages to facilitate mounting without having to wait for the final delivery date.

KUMA - A universe of shapes and colours

Shelf console

KUMA HOTEL CONCEPT

A versatile solution that adds value to any hotel investment through design, functionality and durability.

- Resistant
- Exclusive design
- Adaptable to any space
- With multiple integrated functions (countertop area for cosmetics, cut-out for towel)
- Easy to mount
- Easy to maintain
- Long-life products
- Possibility of refinishing the product after years of use to look like new

The decision to invest in a product with a proven quality is a rational decision that provides benefits to both the developer/builder and the end-client through durability and long term use.

About KUMA

Manufacturer in Romania of washbasin concepts for bathrooms

KUMA serves the market of hotel, residential and commercial projects, offering both custom-made washbasin solutions and standard variants, suitable for any budget.

KUMA certifications for quality (ISO9001), for environment (ISO14001) and for occupational safety & health (ISO45001) - together with hundreds of successfully completed projects in over 25 years, represents a real business card that position KUMA as a top supplier in projects in Romania and Scandinavia: hotel, residential buildings, office buildings, hospitals, airports, etc.

Minimalist nordic design, modern technology and high manufacturing standards ensure the production of high quality washbasins with excellent design.

KUMA addresses domestic market as well as markets in Scandinavia, Italy, France, Holland, Hungary, Greece - 80% of the production from our factory in Bănești, Prahova county being exported.

KUMA - CERTIFIED PRODUCER OF WASHBASINS FOR SUSTAINABLE BUILDINGS

KUMA is certified by Intertek Group, an internationally recognised British multinational company specialising in inspection, testing and certification.
The certifications cover ISO 9001 – Quality Management, ISO 14001 – Environmental Management and ISO 45001 – Occupational Health and Safety.

KUMA products are assessed through an independently verified EPD (Environmental Product Declaration), in accordance with EN 15804+A2, using the Life Cycle Assessment (LCA) methodology.

We obtained 2 new Certificates: EPD – Environmental Product Declaration for KUMA products

The Environmental Product Declaration (EPD) is a detailed report that assesses the environmental impact of a product throughout its lifecycle, emphasizing the reduction of greenhouse gas emissions and other environmental hazards. It enhances transparency and allows consumers to make informed choices about sustainable products, thereby encouraging companies to adopt environmentally friendly practices.

EPD certification enables KUMA Romania to directly contribute to green building projects pursuing BREEAM and LEED certification by providing verified environmental performance data.
