

KUMA[®]

UNIQUE CERTIFIED CONCEPTS

KUMA ECO STANDARD BL

NORDIC DESIGN

KUMA is certified by an internationally recognised company – INTERTEK Plc. – a leader in assurance, testing, inspection and certification for industries worldwide.

Certifications

KUMA's certifications for **quality (ISO9001)**, **environment (ISO14001)** & **occupational health and safety (ISO45001)** are a real calling card. These certifications have contributed to strengthening KUMA's credibility and achieving a significant market share in the field of B2B projects.

Quality certification
ISO 9001:2015 UKAS issued by
INTERTEK Group plc

Environmental certification
ISO 14001:2015 issued by
INTERTEK Group plc

Occupational Health & Safety
Certification ISO 45001:2018 issued by
INTERTEK Group plc

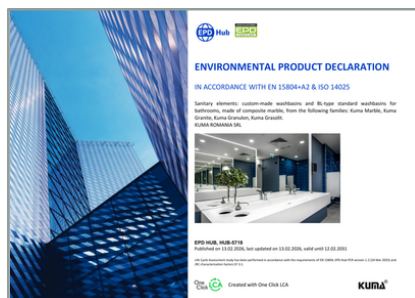

Declaration of Performance
CE No. 37 SRAC CERT
CF. EN 14688-A1:2018

EPD – Environmental Product Declaration for KUMA products

KUMA products are assessed through an independently verified EPD (Environmental Product Declaration), in accordance with EN 15804+A2, using the Life Cycle Assessment (LCA) methodology. EPD certification enables KUMA Romania to directly contribute to green building projects pursuing BREEAM and LEED certification by providing verified environmental performance data.

[EPD - Marble Product Range](#)

[EPD - RECTOR Product Range](#)

Ecovadis KUMA is proud to have received Ecovadis "COMMITTED" recognition, which is awarded for good performance in the four categories below.

KUMA ECO STANDARD BL

KUMA has developed a unique 15 mm product concept, ECO STANDARD BL, which takes into account the need to reduce resource consumption and implicitly the CO₂ footprint.

The KUMA ECO STANDARD BL concept represents a philosophy centered on sustainability, efficiency and reduced environmental impact. Key benefits for customers include:

LESS MATERIAL - Economical Material Usage:

KUMA ECO STANDARD BL concept not only delivers a high-quality design and functionality for our clients but also underscores our commitment to sustainability through the thoughtful reduction in material consumption.

LESS CO2 footprint - Environmental Responsibility:

By choosing the 15 mm thickness, clients actively contribute to environmental sustainability.

The decreased CO₂ footprint aligns with eco-friendly building practices, reflecting a commitment to responsible design.

LESS weight - Convenient Handling and Installation:

The lighter weight of the KUMA ECO BL washbasins enhances ease of handling during transportation and installation, streamlines the construction process and potentially reduces labour and associated costs.

LESS installation height - Versatile Application and Space Optimization:

Clients gain flexibility in design and space utilization through the KUMA ECO BL adaptable standard range.

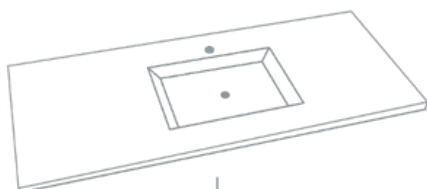

The hybrid overflow system contributes to optimizing available space, providing clients with versatile design options.

LESS height on packaging boxes - Cost-Effective Logistics:

The reduced packaging box height translate to practical benefits for clients, simplifies construction logistics and contribute to more cost-effective transportation and storage.

CUSTOMIZED SOLUTIONS

High-quality materials and modern colors

1 / MARBLE

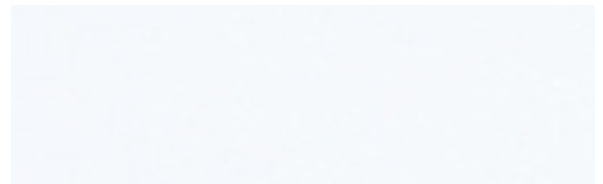

KUMA Marble is a cast material consisting of natural marble granules and polyester resins. The surface is covered with a non-porous sanitary gelcoat that provides strength, impermeability, antibacterial and anti-limescale properties.

NORDIC WHITE

2 / RECTOR

KUMA Rector® is a cast material, made by Solid Surface technology. KUMA pours this type of material into molds and does not process tiles. This technique makes the final product unique and sets it apart in the market.

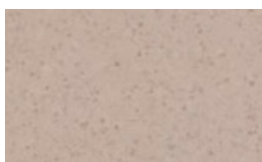

WHITE

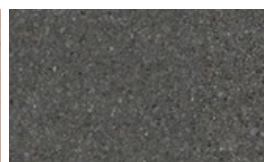

3 / GRANULON

KUMA Granulon is a cast material consisting of a mixture of natural marble powder and polyester resin. The surface is sprayed with polyester granules in various colors, which provide resistance, impermeability, antibacterial and anti-limescale properties.
